

Why we stand - Reference List

Systematic Review and Evidence-Based Clinical Recommendations for Dosing of Paediatric Supported Standing Programs. (Paley, Ginny, S et al 2013)

Effect of weight-bearing in abduction and extension on hip stability in children with cerebral palsy (Martinsson & Himmelmann, 2011)

Choosing support equipment in children's therapy. (Bakewell J 2007)

Use of prolonged standing for individuals with spinal cord injuries. (Eng JJ, et al 2001)

Limb contractures in progressive neuromuscular disease and the role of stretching, orthotics, and surgery. (McDonald CM.1998)

Effects of prolonged muscle stretch on reflex and voluntary muscle activations in children with spastic cerebral palsy. (Tremblay F, et al 1990)

Factors affecting prescription and implementation of standing-frame programs by school-based physical therapists for children with impaired mobility. (Taylor K. 2009)

A systematic review of supported standing programs. (Glickman LB, et al 2010)

Use of a device to support standing during a physical activity program to improve function of individuals with disabilities who reside in a nursing home. (Netz Y, et al. 2007)

The use of standing frames for contracture management for nonmobile children with cerebral palsy. (Gibson SK, et al. 2009).

Hip subluxation and dislocation with postural management. (Pountney T, et al, 2009)

Management of hip dislocation with postural management (Pountney T, et al, 2002)

Hip and spine in children with cerebral palsy: musculoskeletal development and clinical implications (Gudjonsdottir BSV 1997)

Effects of the standing program with hip abduction on hip acetabular development in children with spastic diplegia (Macias-Merlo L, et al. 2015)

Considerations related to weight-bearing programs in children with developmental disabilities. (Sturberg WA. 1992)

Quantifying weight-bearing by children with cerebral palsy while in passive standers (Herman D, et al 2007)

The effectiveness of passive stretching in children with cerebral palsy. (Pin T, et al. 2009)

Severe and Complex Neurological Disability: Management of the physical condition. (Pope P. et al 2007)
